

Who wrote your tests this week?

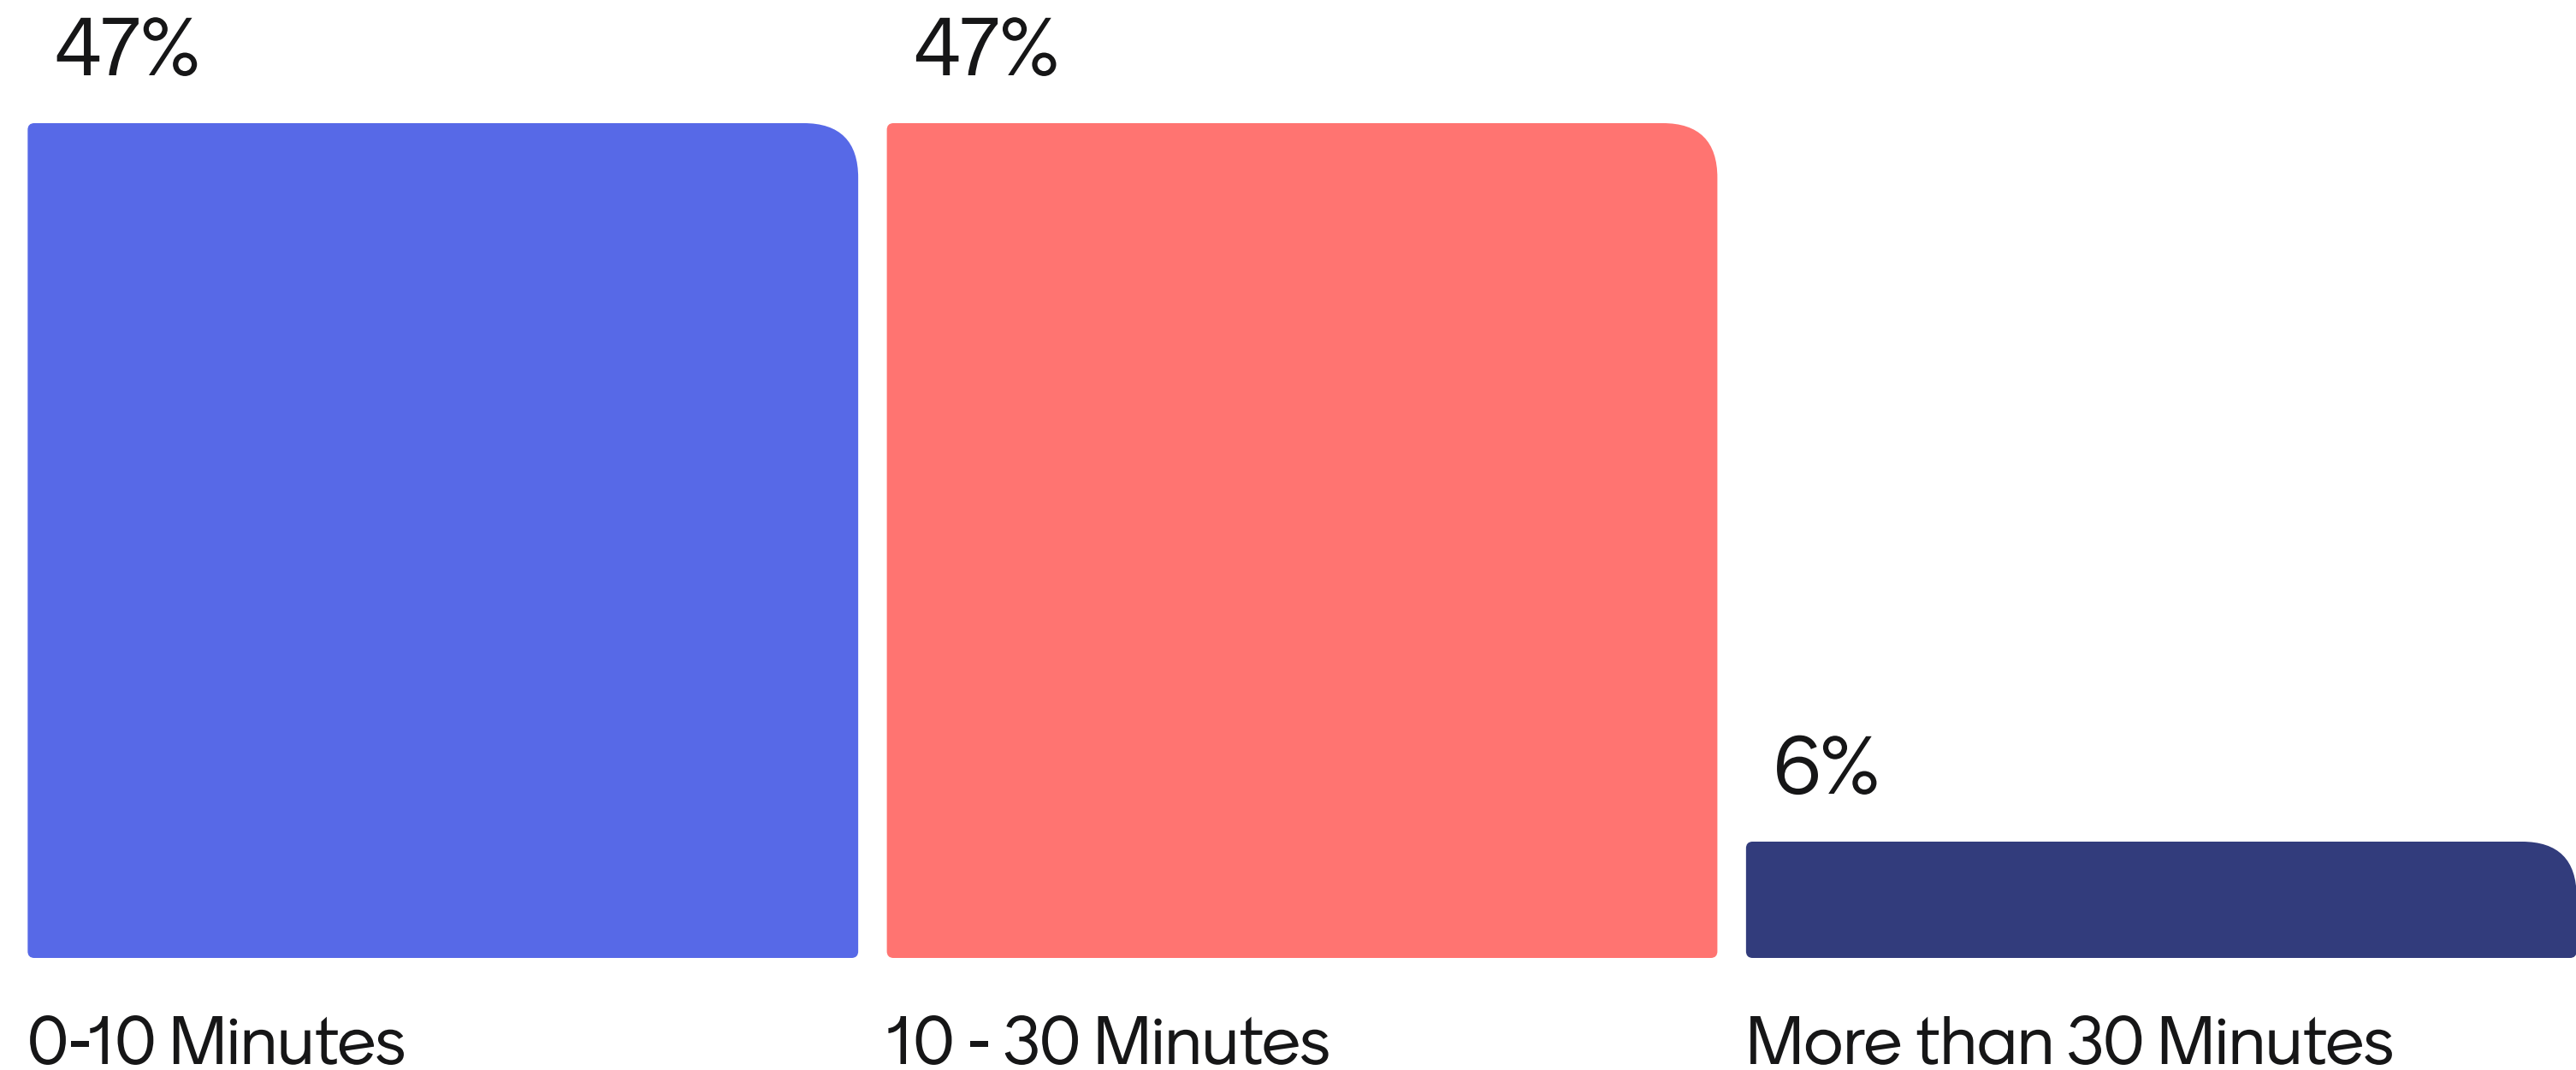

How would you rate your Spring Boot testing knowledge?

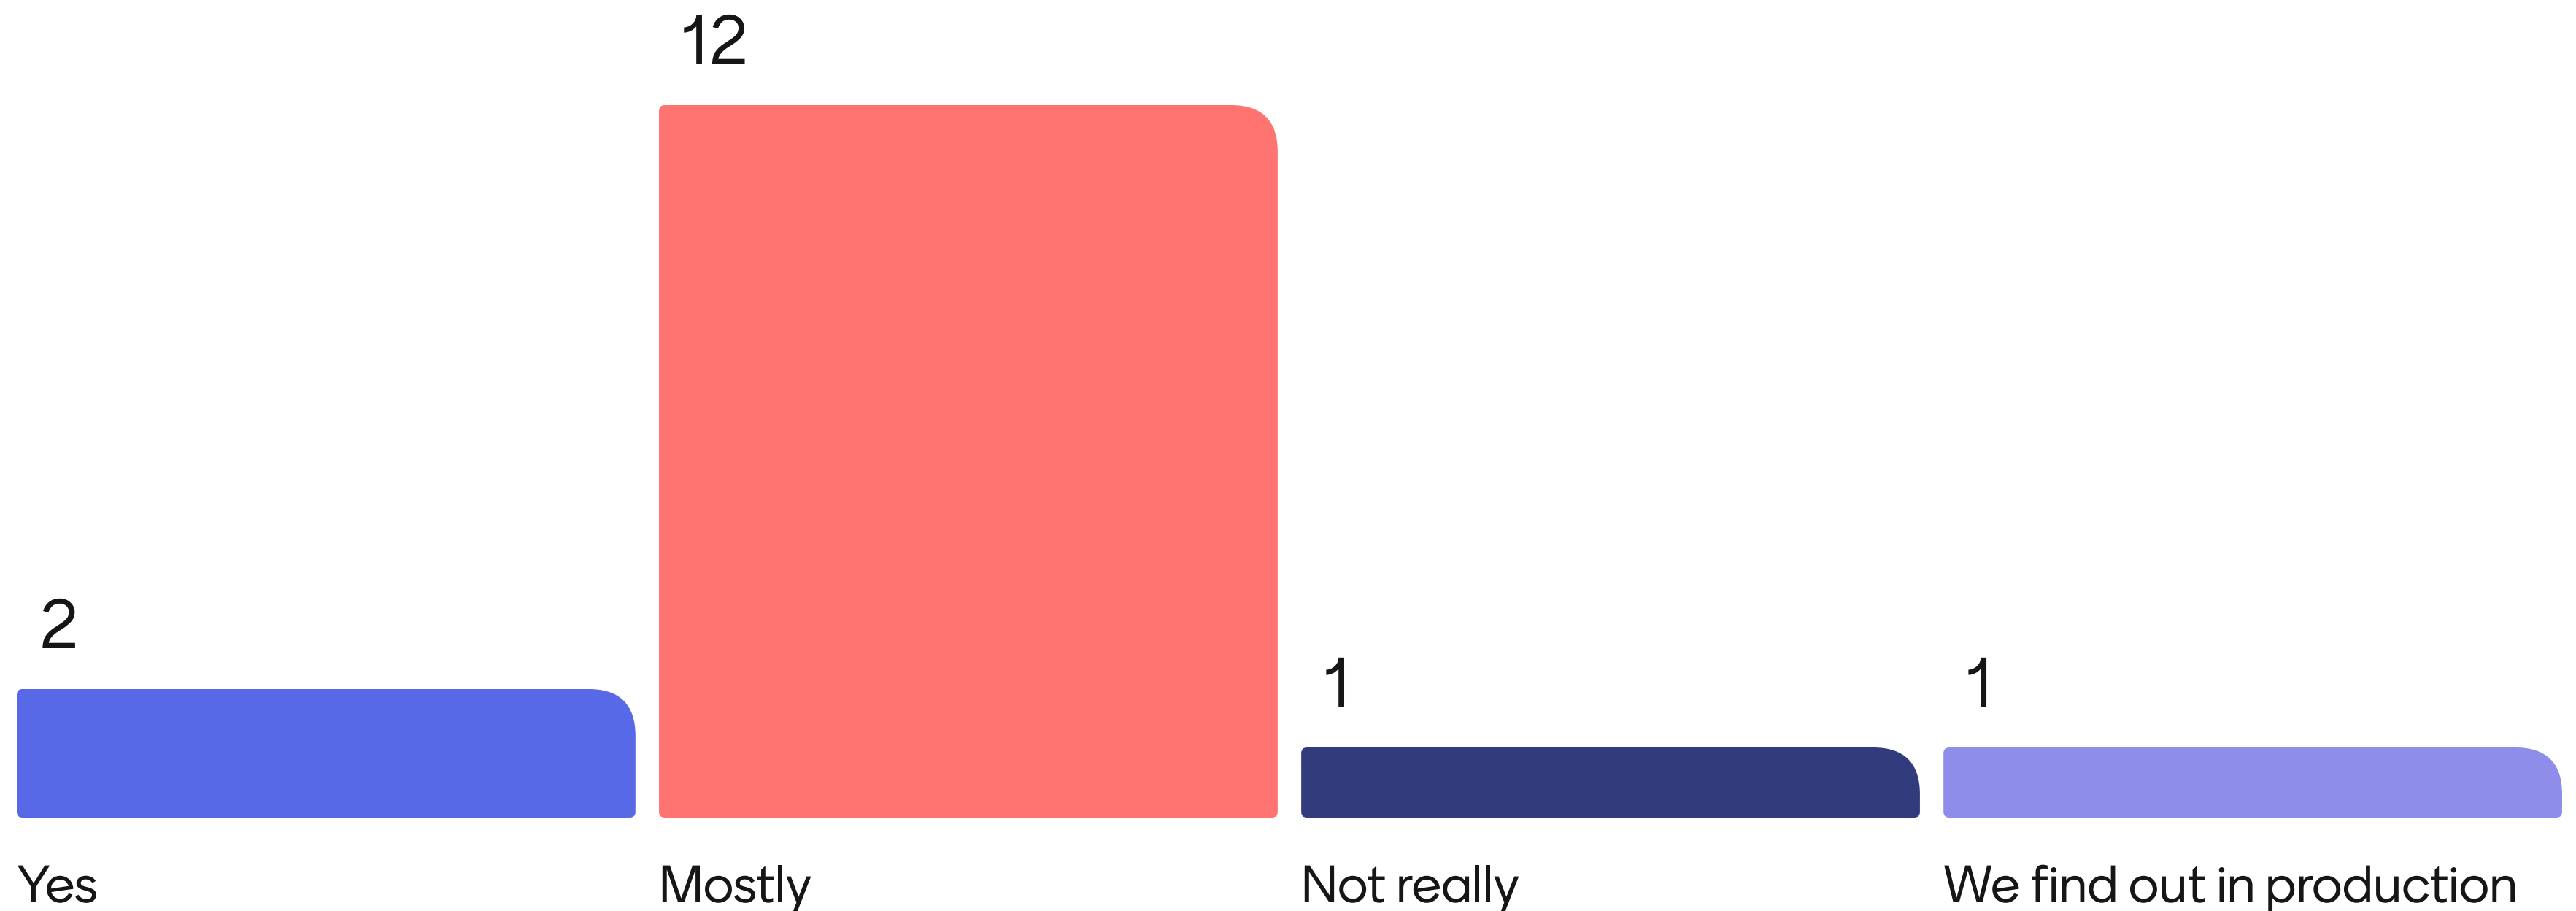

How confident are you deploying on a Friday afternoon?

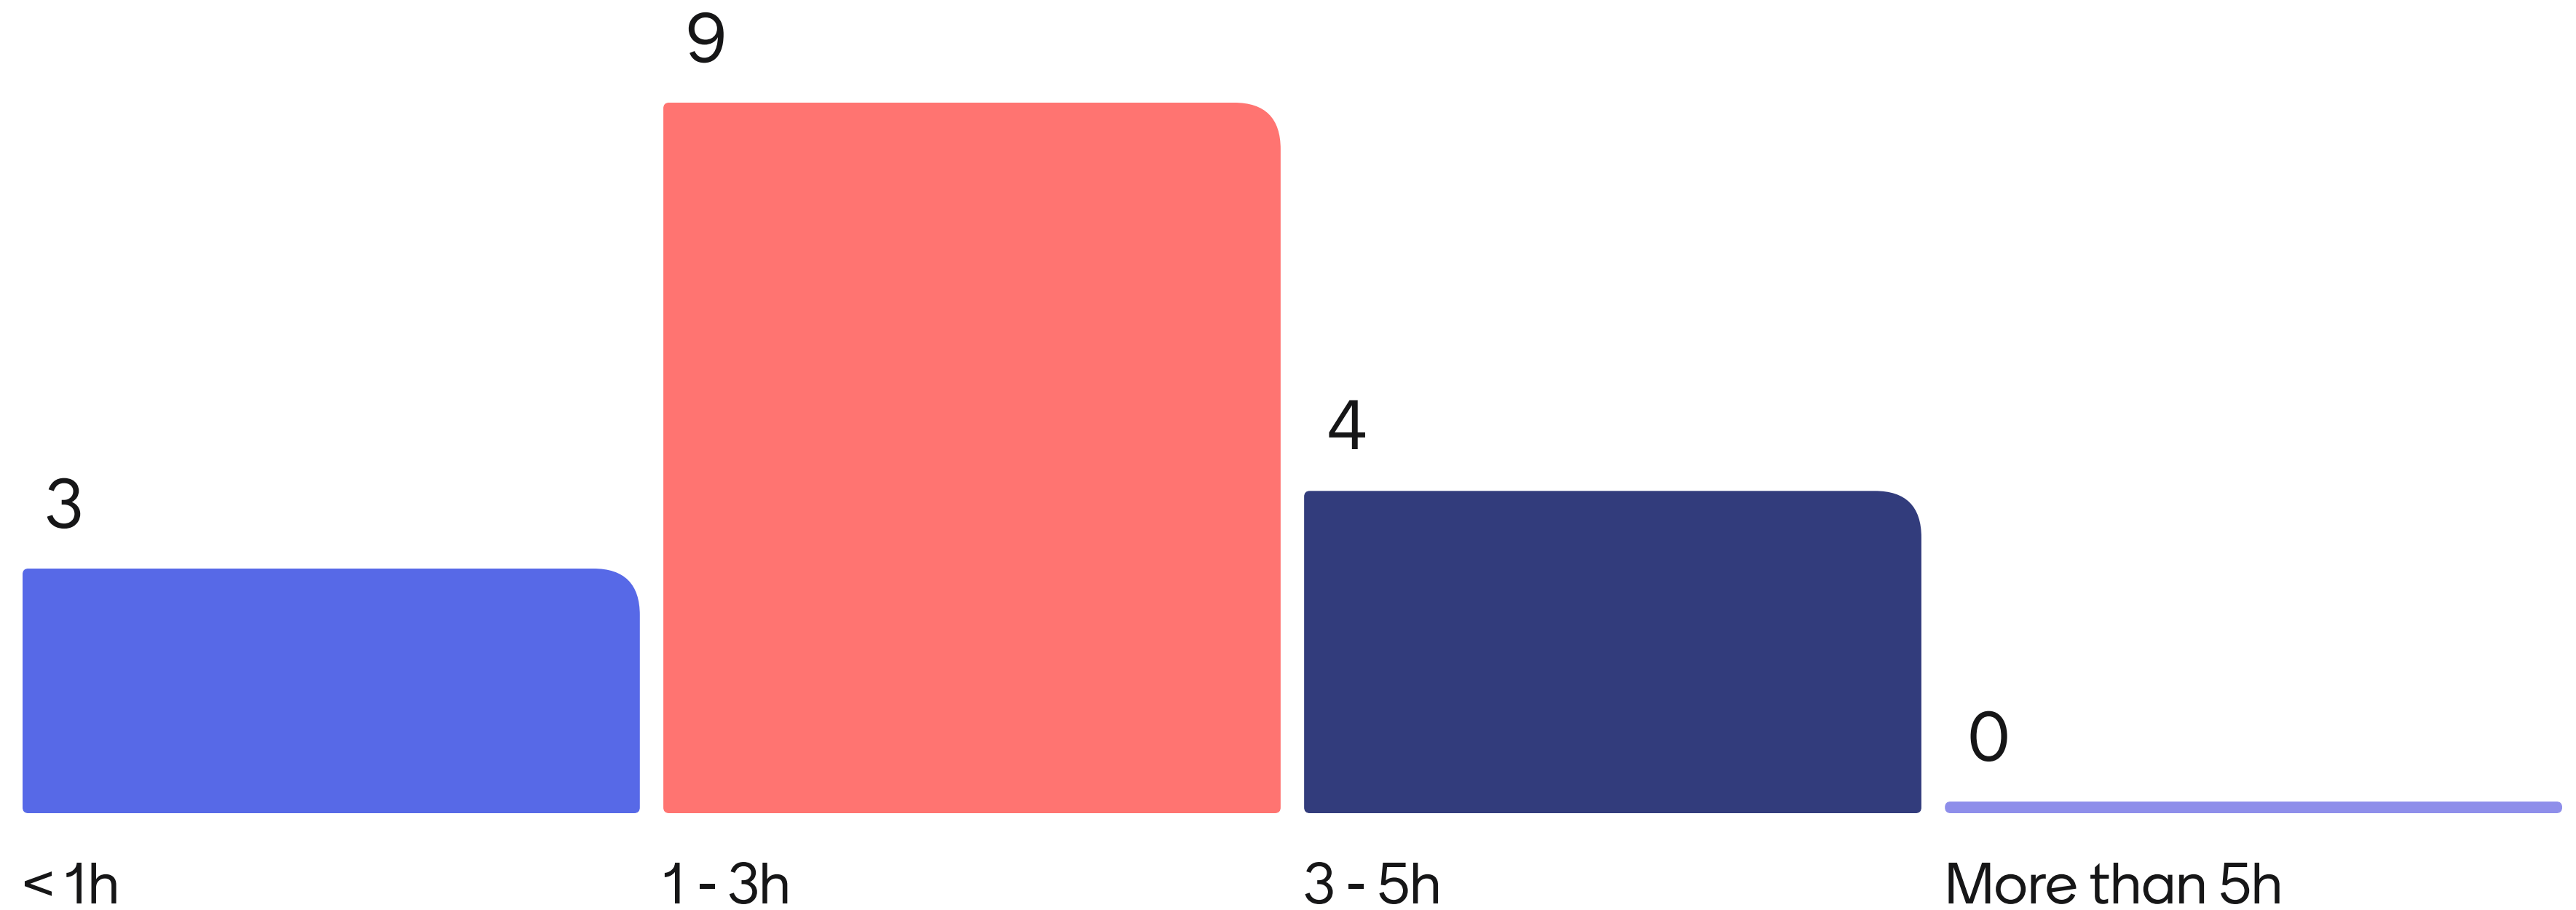

How long does your CI pipeline take (build, test, verify)?

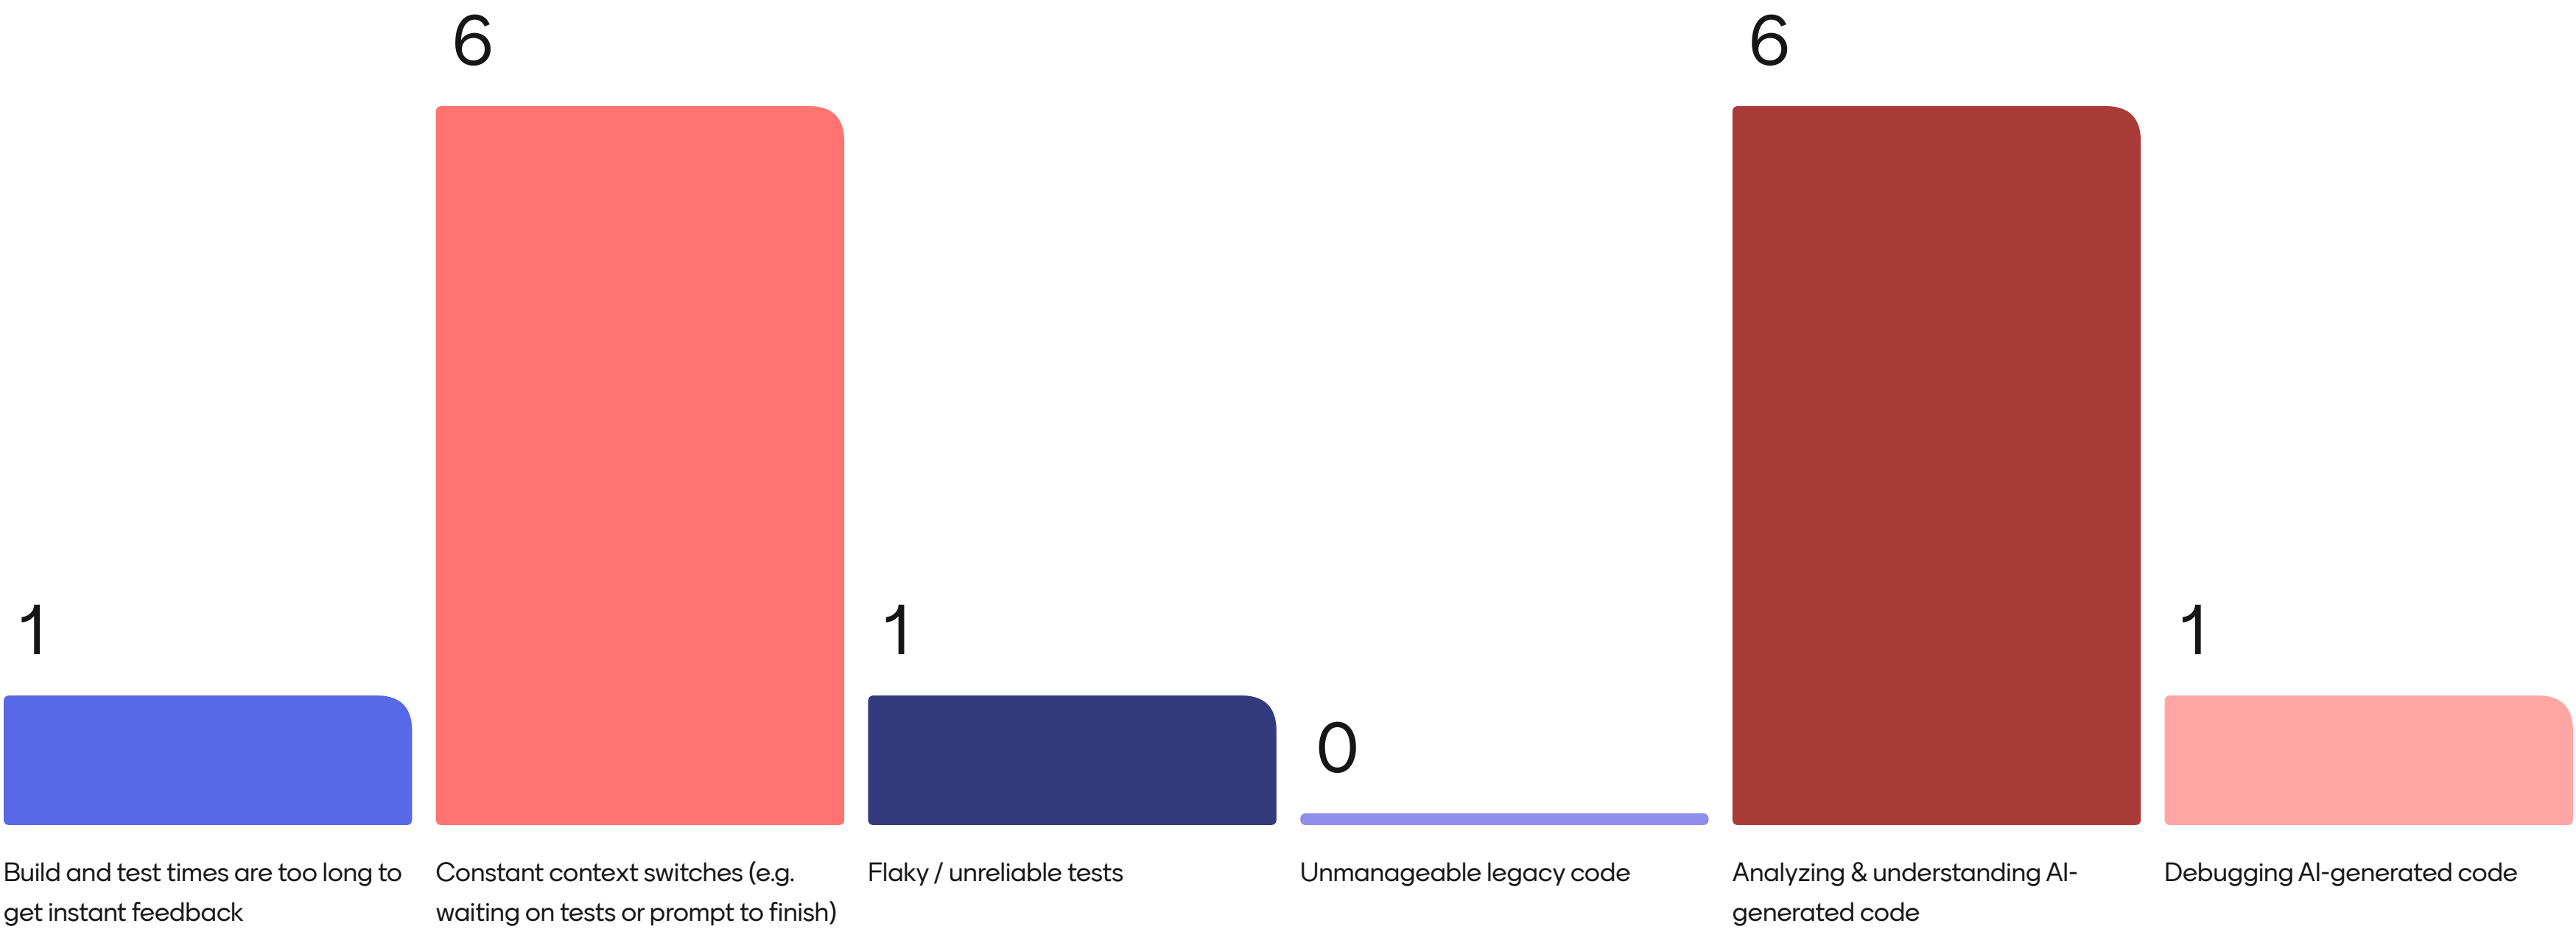

Do you trust your test suite to catch a real regression?

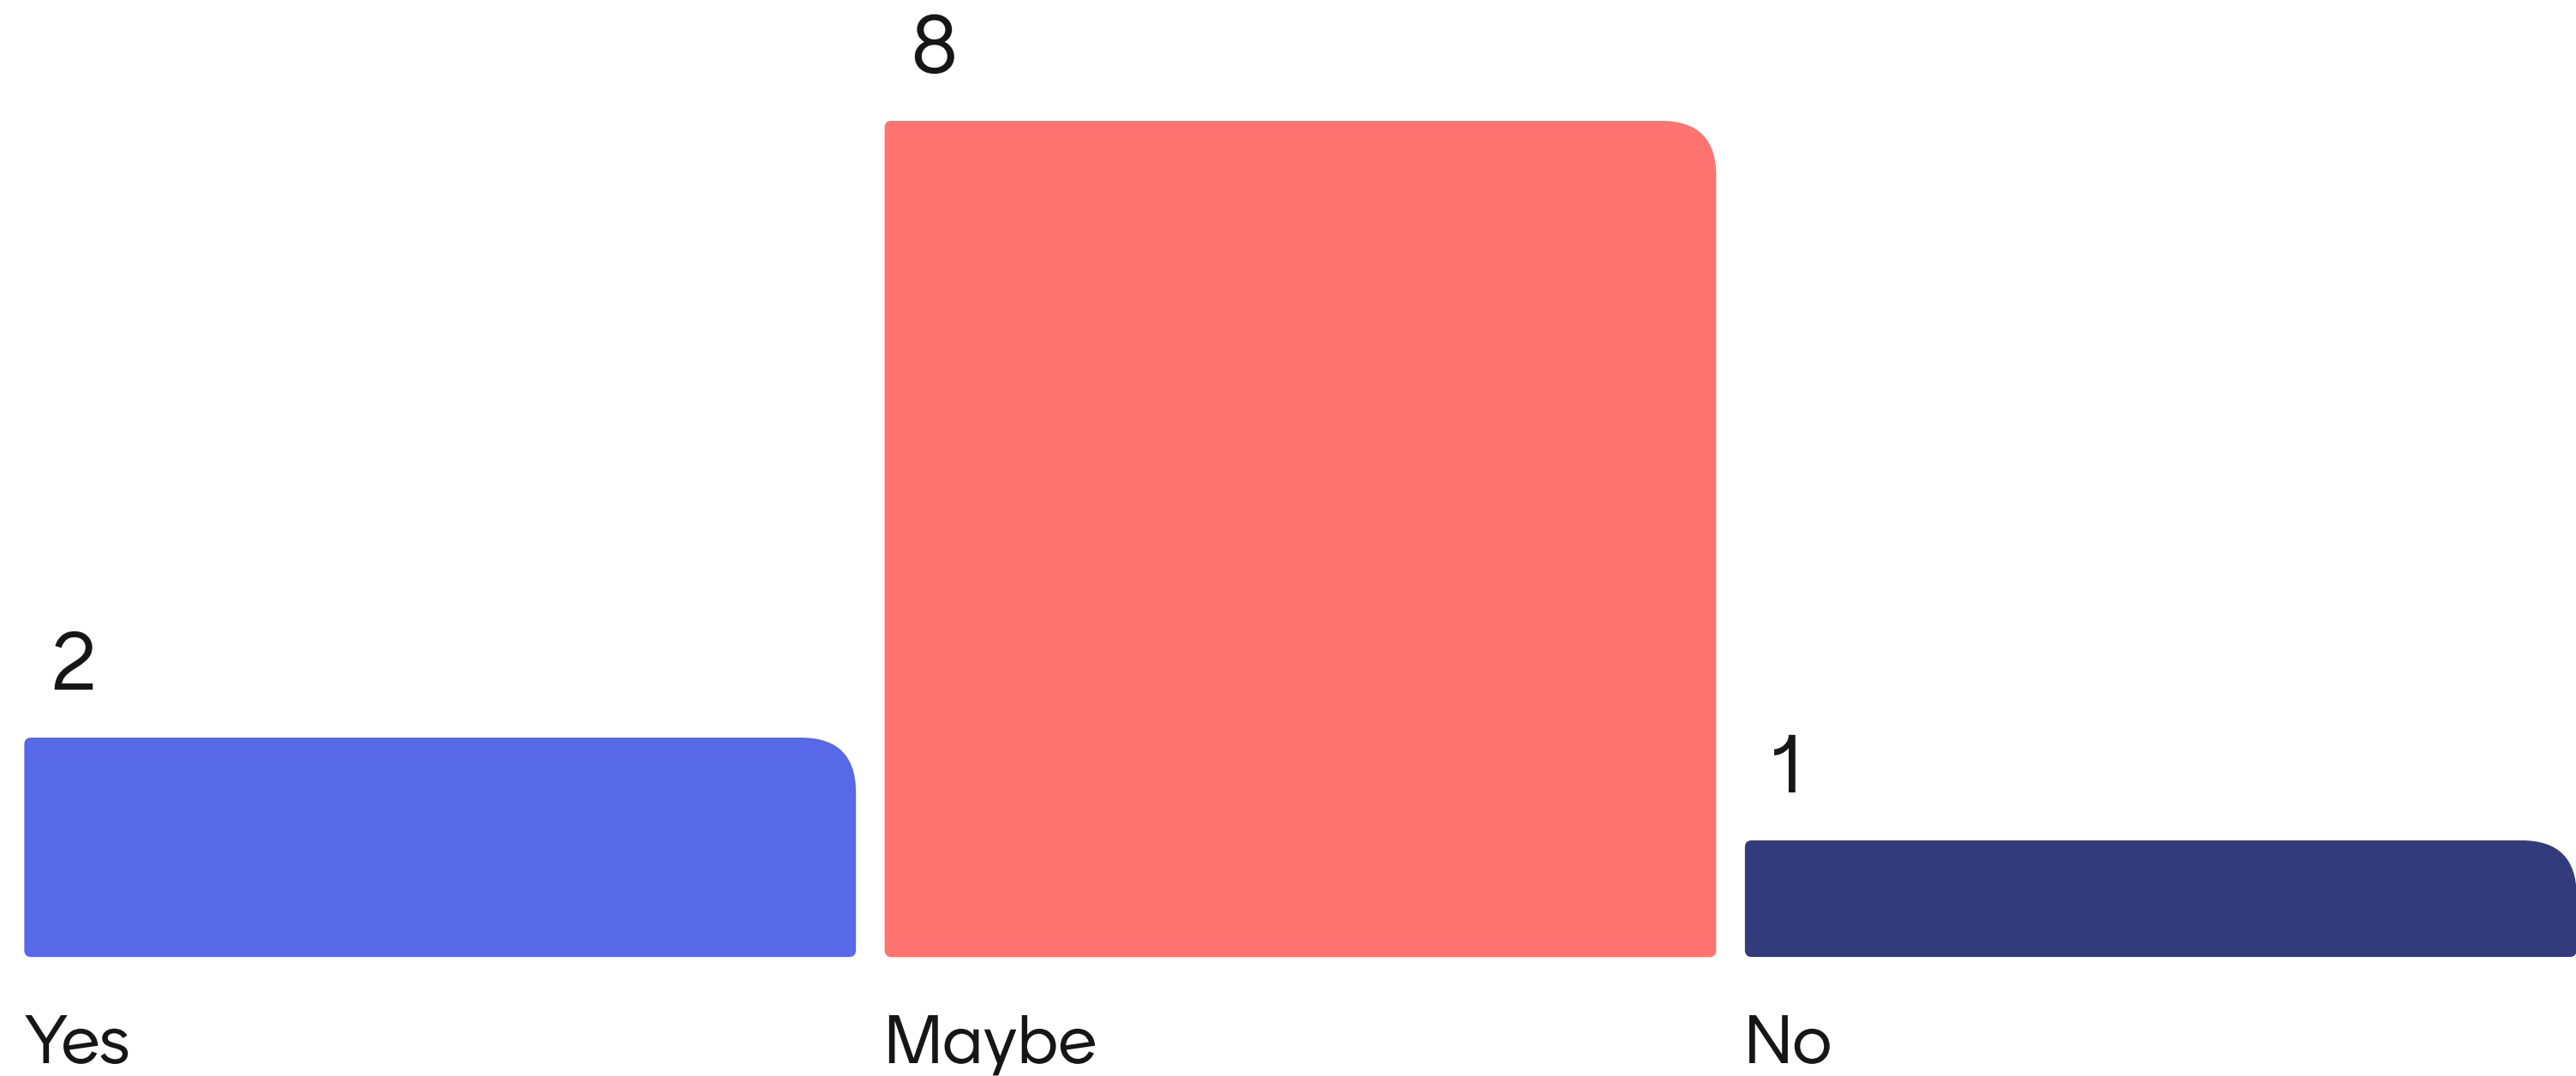

How many hours per week do you lose waiting for builds or debugging flaky tests?

What frustrates you the most about your current AI development, deployment or testing process?

I'd Be Interested in a Workshop to Dive Deeper in This Topic

What's the biggest Spring Boot testing challenge in your team/company?

Long running pipelines

Authentication and
providing (realistic) test
data
